## Workplace Health and Safety Policy

*Natural State provides a range of land management, natural area restoration, project management and consulting services in Tasmania.*

Natural State puts a high value on health and safety, recognising that health and safety is the responsibility of everyone in the workplace, and therefore all employees, contractors and visitors are expected to work and behave as safely as reasonably practicable. Safety should never be compromised on any job. Although accidents may happen, the chance of harm to people and property can be minimised through preventative action, ongoing identification of potential risks and hazards, putting into practice appropriate control mechanisms, and learning from and improving upon our own and others' experiences.

Natural State encourages a culture of safety; and we will undertake a considered and transparent risk management approach when making business decisions. To meet the objectives of this policy, we are committed to regular discussions with employees/subcontractors to ensure that health and safety issues are regularly reviewed.
